INNOVATIVE SOLUTIONS

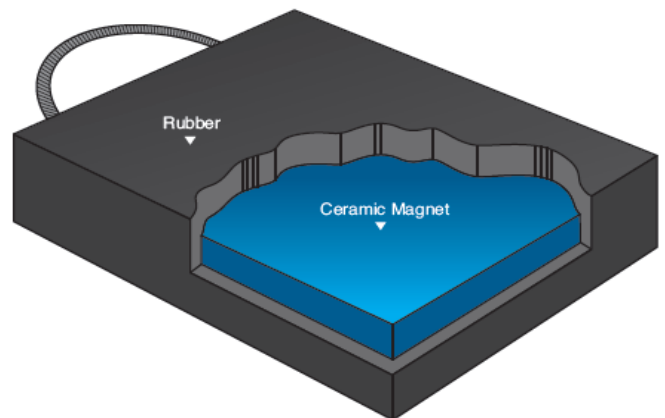

## MagPatch™ Magnetic Wear Patches

Imatech's **MagPatch™** Magnetic Wear Patches are an innovative solution to holes worn through fixed plant infrastructure such as transfer chutes, bins, impact plates/deflectors pipes and elbows. They come in a range of sizes and dimensions to suit a variety of applications and studhole patterns.

**MagPatch™** consist of a ceramic magnet encased within high tensile vulcanized rubber and feature a handle to assist in manual handling, placement and removal.

Requiring no hot works, **MagPatch™** is simply placed over the location of the hole to prevent further damage to infrastructure by providing a hardwearing physical barrier against further parent metal damage.

*“Simply place over hole and stop ore spillage.”*

*Also available in flexible form for curved surfaces such as pipes and elbows*

### Benefits

- Quick and easy application
- Saves down time
- No permits required
- No tools required
- Can be used on flat or curved surfaces

### Sizes

- 1 ML-0001-1 89 mm x 165 mm x 50 mm
- 2 ML-0001-2 165 mm x 165 mm x 50 mm
- 3 ML-0001-3 165 mm x 241 mm x 50 mm
- 4 ML-0001-4 165 mm x 317 mm x 50 mm
- 5 ML-0001-5 242 mm x 317 mm x 50 mm
- 6 ML-0001-6 317 mm x 317 mm x 50 mm
- 7 ML-0033-1 254 mm x 159 mm x 41mm (flexible)
